Subject Index—Volume 64

Alaska

Wildland fire education: Going the distance in Alaska. Sandi Sturm; Matt Weaver. 64(2): 51–53.

American Indians

American Indian fire use in the arid West. Gerald W. Williams. 64(3): 10–14.

American Indian influence on fire regimes in California's coastal ranges. Jon E. Keeley. 64(3): 15–16.

Blackfeet fire use in battle. Editor. 64(3): 9.

Fire use during the Great Sioux War. Karl Brauneis. 64(3): 4–9.

Reports of American Indian fire use in the East. Hutch Brown. 64(3): 17–22.

Art

Visualizing the Ten and Eighteen—With humor. Kathy Murphy. 64(2): 4–5.

Aviation

Air tanker vortex turbulence—Revisited. Donald A. Haines. 64(1): 64–65.

Safety alert: Watch out for aircraft turbulence! Billy Bennett. 64(1): 86–87.

Vortex turbulence—Its effect on fire behavior. James B. Davis; Craig C. Chandler. 64(1): 45–48.

Awards

Fifth annual Franklin Awards ceremony. April Baily. 64(3): 39–40.

NASA honors Texas Forest Service incident management team. Amanda Fazzino. 64(3): 41.

Botswana

Wildland fires in Botswana. Witness Mojeramane. 64(4): 34–36.

California

American Indian influence on fire regimes in California's coastal ranges. Jon E. Keeley. 64(3): 15–16.

Fires in the wildland/urban interface: Best command practices. Michael S. Rohde. 64(2): 27–31.

Canada

Canadian Fire Weather Index System: Training now available on CD-ROM. Paul St. John; Martin E. Alexander. 64(2): 54–55.

Cooperation

American Indian influence on fire regimes in California's coastal ranges. Jon E. Keeley. 64(3): 15–16.

Building group cohesion in type 2 fire crews. Bill Lee. 64(2): 48–50.

Fire prevention team shows its worth in Georgia. James T. Paul; Daniel Chan; Alan Dozier. 64(2): 43–47.

Got clearance? Jon P. Agner. 64(4): 12.

Wildland fire education: Going the distance in Alaska. Sandi Sturm; Matt Weaver. 64(2): 51–53.

Equipment and Engineering

Improving a wildland fire situation analysis through GIS. Matthew Galyardt; Lloyd Queen; Laura Ward. 64(4): 39–43.

A new tool for fire managers—An electronic duff moisture meter. Peter R. Robichaud; Jim Bilskie. 64(2): 15–18.

A new tool for mopup and other fire management tasks. Bill Gray. 64(4): 46–47.

The Pocket PC can increase your productivity. Ed Martin. 64(4): 44–45.

Fire Behavior

"The air was fire": Fire behavior at Peshtigo in 1871. Hutch Brown. 64(4): 20–30.

Air tanker vortex turbulence—Revisited. Donald A. Haines. 64(1): 64–65.

Altered fire cycles in the Northern Rockies. Stephen W. Barrett. 64(3): 25–30.

Atmospheric stability forecast and fire control. Rollo T. Davis. 64(1): 56–58.

Beyond the safety zone: Creating a margin of safety. Mark Beighley. 64(1): 78–81.

A changing fire environment: The task ahead. Jerry Williams. 64(4): 7–11.

The concept of fire environment. C.M. Countryman. 64(1): 49–52.

Downbursts and wildland fires: A dangerous combination. Donald A. Haines. 64(1): 59–61.

Estimating slope for predicting fire behavior. Patricia L. Andrews. 64(1): 62–63.

Firefighter safety zones: How big is big enough? Bret W. Butler; Jack D. Cohen. 64(1): 82–85.

Forecasting wildland fire behavior: Aids, guides, and knowledge-based protocols. M.E. Alexander; D.A. Thomas. 64(1): 4–11.

Forest fires and sea breezes. G.L. Hayes. 64(1): 12–14.

Fundamentals of fire behavior. H.T. Gisborne. 64(1): 15–23.
Get the most from your wind-speed observation. John S. Crosby; Craig C. Chandler. 64(1): 53–55.
How IC's can get maximum use of weather information. Christopher J. Cuoco; James K. Barnett. 64(1): 72–77.
Meteorological problems associated with mass fires. DeVer Colson. 64(1): 34–36.
Probability of spot fires during prescribed burns. John R. Weir. 64(2): 24–26.
Recognizing weather conditions that affect forest fire behavior. Owen P. Cramer. 64(1): 29–33.
Safety alert: Watch out for aircraft turbulence! Billy Bennett. 64(1): 86–87.
Some principles of combustion and their significance in forest fire behavior. George M. Byram. 64(1): 37–44.
A trend analysis of fireline "Watch Out" Situations in seven fire-suppression fatality accidents. Gene A. Morse. 64(1): 66–69.
Vertical wind currents and fire behavior. John S. Crosby. 64(1): 24–26.
Vortex turbulence—Its effect on fire behavior. James B. Davis; Craig C. Chandler. 64(1): 45–48.
Warning signs for fire fighters. A.A. Brown. 64(1): 27–28.

Fire Ecology

Altered fire cycles in the Northern Rockies. Stephen W. Barrett. 64(3): 25–30.
American Indian influence on fire regimes in California's coastal ranges. Jon E. Keeley. 64(3): 15–16.
What is fire? Eleven ways of seeing fire. Students of Wildland Fire Ecology and Management. 64(3): 30–31.
Wildland Fires in Botswana. Mojeramane, Witness. 64(4): 34–36.
The ying and yang of wildland firefighting. Jeff Connor. 64(3): 32–35.

Fire History

Altered fire cycles in the Northern Rockies. Stephen W. Barrett. 64(3): 25–30.
American Indian fire use in the arid West. Gerald W. Williams. 64(3): 10–14.
American Indian influence on fire regimes in California's coastal ranges. Jon E. Keeley. 64(3): 15–16.
Fire regimes in the Northern Rockies. Stephen W. Barrett. 64(2): 32–38.

Fire Prevention

Fire prevention team shows its worth in Georgia. James T. Paul; Daniel Chan; Alan Dozier. 64(2): 43–47.
Forecasting wildland fire behavior: Aids, guides, and knowledge-based protocols. M.E. Alexander; D.A. Thomas. 64(1): 4–11.
Fuel mapping for the future. C.W. Woodall; G.R. Holden; J.S. Vissage. 64(2): 19–21.
Got clearance? Jon P. Agner. 64(4): 12.
Keetch–Byram Drought Index: Can it help predict wildland fires? Daniel W. Chan; James T. Paul; Alan Dozier. 64(2): 39–42.

Fire Use

American Indian fire use in the arid West. Gerald W. Williams. 64(3): 10–14.
Early voices for light burning. Hutch Brown. 64(3): 23–24.
Fire use during the Great Sioux War. Karl Brauneis. 64(3): 4–9.
Reports of American Indian fire use in the East. Hutch Brown. 64(3): 17–22.

Fuels/Fuels Management

American Indian fire use in the arid West. Gerald W. Williams. 64(3): 10–14.
The consumption strategy: Increasing safety during mopup. Tom Leuschen; Ken Frederick. 64(1): 88–92.
Early voices for light burning. Hutch Brown. 64(3): 23–24.
Got clearance? Jon P. Agner. 64(4): 12.
Fuel mapping for the future. C.W. Woodall; G.R. Holden; J.S. Vissage. 64(2): 19–21.
Fundamentals of fire behavior. H.T. Gisborne. 64(1): 15–23.
Keetch–Byram Drought Index: Can it help predict wildland fires? Daniel W. Chan; James T. Paul; Alan Dozier. 64(2): 39–42.
Managing fire-dependent ecosystems: We need a public lands policy debate. Jerry Williams. 64(2): 6–11.
A new tool for fire managers—An electronic duff moisture meter. Peter R. Robichaud; Jim Bilskie. 64(2): 15–18.
Some principles of combustion and their significance in forest fire behavior. George M. Byram. 64(1): 37–44.

Georgia

Fire prevention team shows its worth in Georgia. James T. Paul; Daniel Chan; Alan Dozier. 64(2): 43–47.

Keetch–Byram Drought Index: Can it help predict wildland fires? Daniel W. Chan; James T. Paul; Alan Dozier. 64(2): 39–42.

Hazard/Risk Assessment

Air tanker vortex turbulence—Revisited. Donald A. Haines. 64(1): 64–65.
Atmospheric stability forecast and fire control. Rollo T. Davis. 64(1): 56–58.
Beyond the safety zone: Creating a margin of safety. Mark Beighley. 64(1): 78–81.
The concept of fire environment. C.M. Countryman. 64(1): 49–52.
The consumption strategy: Increasing safety during mopup. Tom Leuschen; Ken Frederick. 64(1): 88–92.
Downbursts and wildland fires: A dangerous combination. Donald A. Haines. 64(1): 59–61.
Firefighter safety zones: How big is big enough? Bret W. Butler; Jack D. Cohen. 64(1): 82–85.
Forecasting wildland fire behavior: Aids, guides, and knowledge-based protocols. M.E. Alexander; D.A. Thomas. 64(1): 4–11.
LCES—A key to safety in the wildland fire environment. Paul Gleason. 64(1): 70–71.
New interagency fire program analysis system. S.L. Robertson; H. Roose. 64(2): 12–14.
Recognizing weather conditions that affect forest fire behavior. Owen P. Cramer. 64(1): 29–33.
Safety alert: Watch out for aircraft turbulence! Billy Bennett. 64(1): 86–87.
Some principles of combustion and their significance in forest fire behavior. George M. Byram. 64(1): 37–44.
A trend analysis of fireline "Watch Out" Situations in seven fire-suppression fatality accidents. Gene A. Morse. 64(1): 66–69.
Vortex turbulence—Its effect on fire behavior. James B. Davis; Craig C. Chandler. 64(1): 45–48.
Warning signs for fire fighters. A.A. Brown. 64(1): 27–28.

History

"The air was fire": Fire behavior at Peshtigo in 1871. Hutch Brown. 64(4): 20–30.
American Indian fire use in the arid West. Gerald W. Williams. 64(3): 10–14.
Blackfeet Fire Use in Battle. Editor. 64(3): 9.
Early voices for light burning. Hutch Brown. 64(3): 23–24.
Fire use during the Great Sioux War. Karl Brauneis. 64(3): 4–9.
Reports of American Indian fire use in the East. Hutch Brown. 64(3): 17–22.
A trend analysis of fireline "Watch Out" Situations in seven fire-suppression fatality accidents. Gene A. Morse. 64(1): 66–69.
A Tribute to Engine 804. Patterson, Sara. 64(4): 19.

Incident Management

Air tanker vortex turbulence—Revisited. Donald A. Haines. 64(1): 64–65.
Atmospheric stability forecast and fire control. Rollo T. Davis. 64(1): 56–58.
A changing fire environment: The task ahead. Jerry Williams. 64(4): 7–11.
Dowr.bursts and wildland fires: A dangerous combination. Donald A. Haines. 64(1): 59–61.
The fire below: Suppression tactics from above. Mike Benefield. 64(4): 37–38.
Forest fires and sea breezes. G.L. Hayes. 64(1): 12–14.
Get the most from your wind-speed observation. John S. Crosby; Craig C. Chandler. 64(1): 53–55.
How IC's can get maximum use of weather information. Christopher J. Cuoco; James K. Barnett. 64(1): 72–77.
NASA honors Texas Forest Service incident management team. Amanda Fazzino. 64(3): 41.
A trend analysis of fireline "Watch Out" Situations in seven fire-suppression fatality accidents. Gene A. Morse. 64(1): 66–69.
Warning signs for fire fighters. A.A. Brown. 64(1): 27–28.

Investigations

Wildland fire investigation standards. Paul T. Steensland. 64(3): 36–38.

Personnel

Building group cohesion in type 2 fire crews. Bill Lee. 64(2): 48–50.
Developing the fire service workforce through mentoring. Joette Borzik. 64(4): 48–49.
Fire prevention team shows its worth in Georgia. James T. Paul; Daniel Chan; Alan Dozier. 64(2): 43–47.

Policy

A changing fire environment: The task ahead. Jerry Williams. 64(4): 7–11.
Managing fire-dependent ecosystems: We need a public lands policy debate. Jerry Williams. 64(2): 6–11.
Wildland fire investigation standards. Paul T. Steensland. 64(3): 36–38.

Preparedness/Planning

The concept of fire environment. C.M. Countryman. 64(1): 49–52.

The consumption strategy: Increasing safety during mopup. Tom Leuschen; Ken Frederick. 64(1): 88–92.

Estimating slope for predicting fire behavior. Patricia L. Andrews. 64(1): 62–63.

Firefighter safety zones: How big is big enough? Bret W. Butler; Jack D. Cohen. 64(1): 82–85.

Fires in the wildland/urban interface: Best command practices. Michael S. Rohde. 64(2): 27–31.

Forecasting wildland fire behavior: Aids, guides, and knowledge-based protocols. M.E. Alexander; D.A. Thomas. 64(1): 4–11.

Fuel mapping for the future. C.W. Woodall; G.R. Holden; J.S. Vissage. 64(2): 19–21.

Get the most from your windspeed observation. John S. Crosby; Craig C. Chandler. 64(1): 53–55.

How IC's can get maximum use of weather information. Christopher J. Cuoco; James K. Barnett. 64(1): 72–77.

Keetch–Byram Drought Index: Can it help predict wildland fires? Daniel W. Chan; James T. Paul; Alan Dozier. 64(2): 39–42.

Meteorological problems associated with mass fires. DeVer Colson. 64(1): 34–36.

New interagency fire program analysis system. S.L. Robertson; H. Roose. 64(2): 12–14.

A new tool for fire managers—An electronic duff moisture meter. Peter R. Robichaud; Jim Bilskie. 64(2): 15–18.

Probability of spot fires during prescribed burns. John R. Weir. 64(2): 24–26.

Recognizing weather conditions that affect forest fire behavior. Owen P. Cramer. 64(1): 29–33.

Warning signs for fire fighters. A.A. Brown. 64(1): 27–28.

What is fire? Eleven ways of seeing fire. Students of Wildland Fire Ecology and Management. 64(3): 30–31.

The ying and yang of wildland firefighting. Jeff Connor. 64(3): 32–35.

Prescribed Fire

Early voices for light burning. Hutch Brown. 64(3): 23–24.

Estimating slope for predicting fire behavior. Patricia L. Andrews. 64(1): 62–63.

Probability of spot fires during prescribed burns. John R. Weir. 64(2): 24–26.

The concept of fire environment. C.M. Countryman. 64(1): 49–52.

Research/Technology

The concept of fire environment. C.M. Countryman. 64(1): 49–52.

Keetch–Byram Drought Index: Can it help predict wildland fires? Daniel W. Chan; James T. Paul; Alan Dozier. 64(2): 39–42.

Downbursts and wildland fires: A dangerous combination. Donald A. Haines. 64(1): 59–61.

Firefighter safety zones: How big is big enough? Bret W. Butler; Jack D. Cohen. 64(1): 82–85.

Fires in the wildland/urban interface: Best command practices. Michael S. Rohde. 64(2): 27–31.

Get the most from your windspeed observation. John S. Crosby; Craig C. Chandler. 64(1): 53–55.

Improving a wildland fire situation analysis through GIS. Matthew Galyardt; Lloyd Queen; Laura Ward. 64(4): 39–43.

A new tool for fire managers—An electronic duff moisture meter. Peter R. Robichaud; Jim Bilskie. 64(2): 15–18.

Some principles of combustion and their significance in forest fire behavior. George M. Byram. 64(1): 37–44.

Vertical wind currents and fire behavior. John S. Crosby. 64(1): 24–26.

Safety

Air tanker vortex turbulence—Revisited. Donald A. Haines. 64(1): 64–65.

Beyond the safety zone: Creating a margin of safety. Mark Beighley. 64(1): 78–81.

The consumption strategy: Increasing safety during mopup. Tom Leuschen; Ken Frederick. 64(1): 88–92.

Downbursts and wildland fires: A dangerous combination. Donald A. Haines. 64(1): 59–61.

The fire below: Suppression tactics from above. Mike Benefield. 64(4): 37–38.

Firefighter safety zones: How big is big enough? Bret W. Butler; Jack D. Cohen. 64(1): 82–85.

Forecasting wildland fire behavior: Aids, guides, and knowledge-based protocols. M.E. Alexander; D.A. Thomas. 64(1): 4–11.

LCES—A key to safety in the wildland fire environment. Paul Gleason. 64(1): 70–71.

Recognizing weather conditions that affect forest fire behavior. Owen P. Cramer. 64(1): 29–33.

Safety alert: Watch out for aircraft turbulence! Billy Bennett. 64(1): 86–87.

A trend analysis of fireline "Watch Out" Situations in seven fire-

suppression fatality accidents. Gene A. Morse. 64(1): 66–69.
Visualizing the Ten and Eighteen—With humor. Kathy Murphy. 64(2): 4–5.
Warning signs for fire fighters. A.A. Brown. 64(1): 27–28.
Wildland fire investigation standards. Paul T. Steensland. 64(3): 36–38.

Suppression

The fire below: Suppression tactics from above. Mike Benefield. 64(4): 37–38.
Forecasting wildland fire behavior: Aids, guides, and knowledge-based protocols. M.E. Alexander; D.A. Thomas. 64(1): 4–11.
Fundamentals of fire behavior. H.T. Gisborne. 64(1): 15–23.
A new tool for mopup and other fire management tasks. Bill Gray. 64(4): 46–47.
A trend analysis of fireline "Watch Out" Situations in seven fire-suppression fatality accidents. Gene A. Morse. 64(1): 66–69.
Vortex turbulence—Its effect on fire behavior. James B. Davis; Craig C. Chandler. 64(1): 45–48.
The ying and yang of wildland firefighting. Jeff Connor. 64(3): 32–35.

Texas

NASA honors Texas Forest Service incident management team. Amanda Fazzino. 64(3): 41.

Training/Education

Building group cohesion in type 2 fire crews. Bill Lee. 64(2): 48–50.
Canadian Fire Weather Index System: Training now available on CD-ROM. Paul St. John; Martin E. Alexander. 64(2): 54–55.
Developing the fire service workforce through mentoring. Joette Borzik. 64(4): 48–49.
Fire prevention team shows its worth in Georgia. James T. Paul; Daniel Chan; Alan Dozier. 64(2): 43–47.
Fundamentals of fire behavior. H.T. Gisborne. 64(1): 15–23.
Got clearance? Jon P. Agner. 64(4): 12.

Visualizing the Ten and Eighteen—With humor. Kathy Murphy. 64(2): 4–5.
What is fire? Eleven ways of seeing fire. Students of Wildland Fire Ecology and Management. 64(3): 30–31.
Wildland fire education: Going the distance in Alaska. Sandi Sturm; Matt Weaver. 64(2): 51–53.
Wildland fire investigation standards. Paul T. Steensland. 64(3): 36–38.

United States—East

"The air was fire": Fire behavior at Peshtigo in 1871. Hutch Brown. 64(4): 20–30.
Reports of American Indian fire use in the East. Hutch Brown. 64(3): 17–22.

United States—West

Altered fire cycles in the Northern Rockies. Stephen W. Barrett. 64(3): 25–30.
American Indian fire use in the arid West. Gerald W. Williams. 64(3): 10–14.
Fire regimes in the Northern Rockies. Stephen W. Barrett. 64(2): 32–38.

Weather

Atmospheric stability forecast and fire control. Rollo T. Davis. 64(1): 56–58.
Canadian Fire Weather Index System: Training now available on CD-ROM. Paul St. John; Martin E. Alexander. 64(2): 54–55.
Downbursts and wildland fires: A dangerous combination. Donald A. Haines. 64(1): 59–61.
Forest fires and sea breezes. G.L. Hayes. 64(1): 12–14.
Fundamentals of fire behavior. H.T. Gisborne. 64(1): 15–23.
Get the most from your wind-speed observation. John S. Crosby; Craig C. Chandler. 64(1): 53–55.
How IC's can get maximum use of weather information. Christopher J. Cuoco; James K. Barnett. 64(1): 72–77.
Meteorological problems associated with mass fires. DeVer Colson. 64(1): 34–36.
Recognizing weather conditions that affect forest fire behavior. Owen P. Cramer. 64(1): 29–33.
Vertical wind currents and fire behavior. John S. Crosby. 64(1): 24–26.
Warning signs for fire fighters. A.A. Brown. 64(1): 27–28.

Wildland/Urban Interface

A changing fire environment: The task ahead. Jerry Williams. 64(4): 7–11.
Fires in the wildland/urban interface: Best command practices. Michael S. Rohde. 64(2): 27–31.
Got clearance? Jon P. Agner. 64(4): 12.
